

Right Dose...Right Med...Right Time

✓ It Organizes
✓ It Reminds

✓ It Dispenses
✓ It Notifies & Reports

Medication Management As Easy as 1-2-3

1 Easy to Set-Up & Fill

Load pills into the tray based upon doses per day. Program the clock and alarm.

2 Easy to Use

MedSmart will beep, flash and rotate when it's time to take your medication.

3 Easy Dispensing

Just flip the unit over to remove the correct pills.

Doctors and pharmacists agree that taking medications at the right time is as important as what medications are being taken.

MedSmart reduces dosing errors, simplifies medication regimens and improves overall health.

"This past year Mom forgot to take her heart medications and ended up in the hospital. We got her MedSmart and now we no longer

have to worry about Mom under or over medicating. The alarm sounds and she gets the correct pills at the right time. It simplified our lives. What great peace of mind for her and the whole family."

With the Caregiver Connect reporting option, MedSmart sends email, text and voice messages to keep caregivers in touch and informed.

- sends timely missed dose alerts
- alerts when tray is low and needs refill
- tracks overall compliance
